

From its looks, the IT900 appears to the employee as a simple, easy to use Badge Reader to clock in/out with, however, the IT900 is packed full of features to meet the most demanding time and attendance applications.

Function keys can be used for employee lookups (number of hours worked, last punched time) and workgroup (department) transfers.

Employee options for clocking in/out include

- Bar Code ID Cards
- Magnetic Stripe ID Cards
- Security / Proximity ID Cards
- PIN Entry
- Finger Reader

Connectivity

- TCP/IP Ethernet Network Adapter
- Modem
- RS232 / RS485

Punch Indicators: Red and green light and adjustable internal beeper to indicate valid transactions

Automatic Daylight Savings Time Adjustment: Automatic forward and backward time adjustment

External Output Relay: Dry contact relay for ringing horns/bells or electronic door lock for employee access.
